

StyleCAD has assisted Sisley Clothing Australia to modernise our processes and growth of family owned business, Our business is big on Customer service and made to measure – customised Aviation suit and specialist Fire Retardant clothing, and

*StyleCAD has enabled us to process and cut orders at a much faster rate and control our fabric utilisation of materials.*

In addition to this, the automarker making upgrade has also been a great tool, taking the manual marker making process away, also great when patterns etc change and you don't create a mountain of work re-creating markers.

The training and support has always for great also.

And now we use this with our Pathfinder cutting machine, and looking back you get the feeling "why didn't we do this sooner."
